""Lockdown"" group permissions per namespace. [[de:{{FULLPAGENAME}}]][[en:{{FULLPAGENAME}}]]
The ""Lockdown"" extension implements a way to restrict access to specific namespaces and special pages to a given set of user groups. This provides a more finely grained security model than the one provided by the default [https://www.mediawiki.org/wiki/Manual:\$wgGroupPermissions \$wgGroupPermissions] and [https://www.mediawiki.org/wiki/Manual:\$wgNamespaceProtection \$wgNamespaceProtection] settings. The following pages about the security model used by MediaWiki per default may be helpful to understand the instructions below: * [https://www.mediawiki.org/wiki/Special:MyLanguage/Manual:User_rights Manual:User rights] * [https://www.mediawiki.org/wiki/Special:MyLanguage/Manual:\$wgGroupPermissions Manual:\$wgGroupPermissions]
==Managing groupsedit== You can control which user belongs to which groups with the page [https://www.mediawiki.org/wiki/Special:UserRights Special:Userrights]. Only existing groups will be proposed, but you can "create" a new group by creating an entry for it in [https://www.mediawiki.org/wiki/Manual:\$wgGroupPermissions Manual:\$wgGroupPermissions] (even if you don't actually need to set a permission there, but it has to appear on the left hand side of the array). For more information please visit [https://www.mediawiki.org/wiki/Extension:Lockdown MediaWiki].
