|-
|exporttime
|time of PDF-creation
|}

Each parameter is added to the header or footer enclosed in three curly brackets, for example:
`<code><nowiki>{{{logo}}}</nowiki></code>.`

In addition, you can simply type in regular text in each section.

===Header===

The header contains a wiki table with three columns. The default content for the first column is the logo of the wiki and the last column shows the page title. The middle column is empty.

*To make changes to the header, open the page "[MediaWiki:UniversalExport/PDF/Default/Header.html](#)" in edit mode.
*

[[File:Manual:PDF-header-table.png|alt=Header table|center|thumb|450x450px|Header table]]

====Using custom text====

If you do not want to show the logo, but display custom text, you can simply delete the existing placeholders and replace them with your text. Be aware that this header will be used for all PDFs on your wiki, including books.

Any of the columns can be left blank.<syntaxhighlight lang="text">

```
{|
| Text in left column || Text in middle column || Text in right column
|}
</syntaxhighlight>
```

====Removing the middle column====

By default, the 3 columns each use 1/3 of the header width. If you need more room for the left or right column, you can remove the middle column. The remaining 2 columns then each get 1/2 of the header width.<syntaxhighlight>

```
{|
|The left column now uses 50% of the header width. || Text in the right column
|}
</syntaxhighlight>
```

[[File:Manual:PDF-header-2col.png|alt=2 columns in the PDF header|center|thumb|650x650px|2 columns in the PDF header]]

====Adding a margin before and after the header====

The margin before and after the header can be adjusted by changing the beginning of the table <code>{|</code> to include a style declaration:

```
{| style="margin-top:20px; margin-bottom:20px;"
```

===Footer===

The footer can be customized just like the header.

By default, the footer shows the creation date of the pdf, a BlueSpice disclaimer, and the page number with number of total pages.

```
{|
| {{{exportdate}}} || {{int:universal-export-pdf-default-disclaimer}} ||
{{{currentpagenumber}}} / {{{totalpagescount}}}
|}
```

To make changes to the footer, open the page "[MediaWiki:UniversalExport/PDF/Default/Footer.html](#)" in edit mode. For example, you could replace the BlueSpice disclaimer in the middle column with the username of the user who printed the pdf.

```
{|
| {{{exportdate}}} || {{{user}}} || {{{currentpagenumber}}} / {{{totalpagescount}}}
|}
</syntaxhighlight>
```

[[File:Manual:PDF-footer-custom.png|alt=PDF footer showing username|center|thumb|650x650px|PDF footer showing username]]

===Header and footer background color===

If you want to use a background-color for the header and footer, you can copy the following style declaration at the end of the page

"[MediaWiki: UniversalExport/PDF/Default/Styles.less](#)":

```
<syntaxhighlight lang="css">
#runningheaderfix, #runningfooterfix {
    background-color: #eee;
}
#runningheaderfix > table {
    border-bottom: none !important;
}
#runningfooterfix > table {
    border-top: none !important;
```

```
}  
</syntaxhighlight><br />
```

==Book cover==

When you print a book to PDF, the book has a basic cover page.

By default, the cover page contains the logo, book title, and a placeholder for the subtitle. If you did not create a subtitle for your book, no subtitle is shown.

```
<br />  
[[File:Manual:PDF-cover-default.png|alt=PDF book default cover|center|thumb|424x424px|PDF book default cover]]  
<br />
```

===Using a cover image===

To customize the cover page for books, you will edit the page "[MediaWiki:UniversalExport/PDF/Default/Cover page.html](#)".

The example shown below contains the following elements:

- *Logo*
- *Background image*
- *Title*
- *Subtitle*

```
[[File:Manual:PDF-cover-withbackground-EN.png|alt=Customized book cover|center|thumb|420x420px|Customized book cover]]
```

This cover page was created with the following source code. You can simply overwrite the existing content:<syntaxhighlight

```
lang="text" line="1">  
{| style="width: 100%; text-align: right;"  
|{{{logo}}}
```

⌋

```
<div style="font-size: 18pt; font-weight:bold; margin-top:5cm; color:#333333">{{{title}}}</div>
<div style="font-size: 14pt; margin-top:11.5cm; color:#333333">{{{subtitle}}}</div>
</syntaxhighlight>
```

**Lines 1-3: A table with the wiki logo.*

**Line 4: Title - here you can define, for example, the font size and font weight, the margin to the top of the page and the font color.*

**Line 5: Subtitle - same as the title. The property "margin-top" sets the distance between title and subtitle.*

====Defining `<span class="mw-headline" id="Untertitel_und_Hintergrundbild_festlegen">the background image and the subtitle</span>`====

The subtitle and background image are set in the book's metadata.

#Go to the book manager.

#Select the book for which you want to customize the cover page. This should be an image with the "full page dimensions" (e.g., DIN A4 or letter size) since it will be shown as a background image.

#On the book editing page, click the wrench. This opens the metadata dialog.
*
[[File:Manual:PDF-cover-metadata-EN.png|alt=Meta data|center|thumb|450x450px|Meta data]]
*

#Select "Bookshelf image" from the drop-down menu (1) and click "Add" (2). In the right column, enter the name of the picture that you want to use for the background. The picture must be uploaded to the wiki. If your picture has a namespace prefix, this must be included in the image name.

#Select "Subtitle" from the drop-down menu (1) and click Add (2). Enter the desired subtitle accordingly in the right column.

#Click "Done".

#Finally, click "Save" at the end of the book editing page.

Now test the layout by printing the book as a PDF using the book management. To make the necessary changes (e.g. spacing between title and subtitle), change the settings accordingly on the "MediaWiki:UniversalExport/PDF/Default/Cover page.html" or in the metadata.

{{Box Note|boxtype=note|Note text=You can define a separate background image for each book using the book's the metadata. However, the picture should always be placed in the same position, since all books share the "Cover page.html". The alignment of the text elements is shared between all cover pages.}}

====Using background colors====

If you do not have a background image for your book covers or if you don't want to use one, you can also work with colors to customize the cover page.

Here are some examples and the needed source text for the page "MediaWiki:UniversalExport/PDF/Default/Cover page.html". To use them, simply overwrite the existing content in that page.

```
<gallery widths="220" heights="300" perrow="34">
File:Manual:Cover-bgcolor-stripe-EN.png|Cover page 1
File:Manual:Cover-bgcolor-topbottom-EN.png|Cover page 2
File:Manual:Cover-bgcolor-middle-withtext-EN.png|Cover page 3
</gallery>
```

```
'''Cover page 1'''<syntaxhighlight lang="text">
<!-- Logo -->
{| style="width: 100%; text-align: right;"
|{{{logo}}}
|}
<!-- Color block -->
<div style="position:absolute; height:2cm; width:1.8cm; background-color:#3a3b3c;
margin:4cm 0 0 -2cm">
```

```
</div>
<div style="position:absolute; height:2cm; width:24cm; background-color:#3366cc;
margin:4cm 0 0 0cm;">
</div>
<!-- Title -->
<div style="font-size:28pt;font-weight:bold;margin:8.5cm 0 1cm 0;color:#333333;">{{{title}}}
</div>
<!-- Subtitle -->
<div style="font-size:16pt; color:#555555">{{{subtitle}}}
</div>
</syntaxhighlight>
```

```
""Cover page 2""<syntaxhighlight lang="text">
<div id="coverpage" style="height:29.7cm; width:21cm; margin:-1cm 0 0 -1.5cm;background: #cdcdcd; overflow:hidden;">
<div style="min-height:10cm; background:white; margin:2cm 0 0 0; padding:1cm">
<!-- Logo -->
{| style="width: 100%; text-align: right;"|
|{{{logo}}}|
|}
<!-- Titelblock -->
<div style="font-size: 32pt; font-weight:bold; padding:0 1cm; margin:4.5cm 0 0.5cm 0;color:#333333;
background:white">{{{title}}}</div>
<div style="font-size: 24pt; margin-top:0; padding:0 1cm; color:#555555;">{{{subtitle}}}
</div>
</div>
</syntaxhighlight>
```

```

'''Cover page 3'''<syntaxhighlight lang="text">
<!-- Logo -->
{| style="width: 100%; text-align: right;"
|{{{logo}}}
|}
<!-- Title block with background color -->
<div style="background-color:#c6752d; margin:4.5cm -2cm 0 -2cm; padding:2cm 2cm 3cm 2cm;">
<div style="font-size: 24pt; font-weight:bold; margin-bottom:0.5cm; color:#ffffff;">{{{title}}}
</div>
<!-- Subtitle block -->
<div style="font-size: 18pt; margin-top:0.5cm; color:#efefef">{{{subtitle}}}
</div>
</div>
</syntaxhighlight>

```

==Tags==

===Landscape printing ===

To print a PDF page in landscape format, the following tag can be inserted in the wiki page in source editing mode at any position:

```
<nowiki><bs:ueparams template="BlueSpiceCloudLandscape" /></nowiki>
```

To make it easier for the user to add this tag with the visual editor, this tag can be added to a wikitext-template, for example, <code style="box-sizing: inherit; font-family: monospace, Courier; font-size: 13.5px; padding: 1px 4px; color: black; background-color: rgb(249, 249, 249); border-radius: 2px; border: 1px solid rgb(221, 221, 221);"><nowiki>{{LandscapeFormatExport}}</nowiki></code>. The element can be inserted anywhere on the page.

```
{{Box Note|boxtype=note|Note text=This tag only works for the PDF single page export.}}
```

```
<br />
```
