

Error:

The name ""BlueSpiceUEModulePDF"" enables the output of a wiki page as Adobe Portable Document Format (PDF).

The user chooses an export function in the widget bar:

****Single page***

****Single page with linked pages***

****Single page with subpages***

Administrators can change the following setting in the [\[\[Reference:BlueSpiceConfigManager|Configuration manager\]\]](#), under [Function>Export or Extension>BlueSpiceUEModulePDF](#). Here wiki administrators can configure:

****"Hide namespace prefix in PDF": The namespace is not shown for page titles in the PDF.***

The wiki page can be printed to PDF in landscape format by adding the following tag anywhere in source view:

<nowiki><bs:ueparams template="BlueSpice_Landscape" /></nowiki>' is too long (710 characters).

Please provide this file in your support ticket
