The "'OATHAuth'" extension is a time-based one-time password [https://en.wikipedia.org/wiki/Time-based_One-time_Password_algorithm] (TOTP) implementation. It provides two-factor authentication [https://en.wikipedia.org/wiki/Multi-factor_authentication] via something you have (your phone or desktop client) and something you know (your user name/password). Client support is available for most feature phones, smartphones and desktops (see Client implementations [https://en.wikipedia.org/wiki/Time-based_One-time_Password_algorithm#Client_implementations]). {{MWlink|https://www.mediawiki.org/wiki/Extension:OATHAuth}}. {{Translation}} [[Category:Extension]] [[Category:BlueSpice pro]]
