"UserMerge" extension allows wiki users with the "usermerge" permission (Bureaucrat by default) to merge one Wiki user's account with another Wiki user's account. The extension allows to \*merge (refer contributions, texts, watchlists, edit count of a first account A to a second account B \*delete the first account A after the merge (option box) Limitations \*you cannot delete a user A without having merged the user A to B \*you cannot merge your own account (logged-in user) into a different user Extras \*if you omit the "New User" field, then the extension auto-populates the New User as "Anonymous" (user\_id 0), and ask you to confirm a merge to Anonymous. This is used for user deletion: you first empty (merge to user 0) contributions of a user A, and then delete the user A. \*If your version of the extension complains about an empty "New User" field you can fill in "Anonymous".
