Description

WikiExplorer supports wiki gardeners who tend the whole wiki. This package keep an eye on all articles and files within the wiki and make sure that it isn't flooded with irrelevant or expired content. For this, WikiExplorer offers a list of all articles and files of the wiki, which can be sorted and filtered on several criteria. This makes it e.g. possible to find all articles with less than 5 views, or articles that haven't been released yet.

Usage / Features

- Multiple sorting and filtering possibilities.
- Easier cleanup of the wiki.

Technical information

Configuration

WikiExplorer is implemented with ExtJS, to maintain compatibility.

Rights (permissions)

WikiEplorer can be used by every user with reading rights. Please note: the only files shown will be file the user has reading rights for. Other articles and files will not be listed.

Requirements

WikiExplorer requires [BlueSpiceFoundation](#).
