Description

Reminder allows users to get an overview of the actuality of those pages in a wiki they are responsible for. For this, Reminder offers a function to set a certain date when the user will be reminded to revise an article.

Usage / Features

- Set a personal reminder with date and comments on every page (via the BlueSpice more menu).
- List of personal reminders.
- Special page with filters for all reminders of a wiki.
- Possibility to mark an article automatically as *expired*.
- Simplified quality assurance through active reminders via email and within the wiki.

Technical information

Configuration

Some aspects of this extension can be configured on Special:BlueSpicePreferences, under section "Reminder". Here wiki administrators can configure:

- Default reminder period.
- Namespaces in which reminders will be disabled for.
- Whether reminders will be set automatically on article creation.
- Whether to show reminders of others on the overview page.

Rights (permissions)

This extension does not require any special rights. Every user with "edit" can create reminders.

Requirements

Reminder requires [BlueSpiceFoundation](#).

User manual
