

## FAQ:UserManager

**Error:** Hi everyone, when i will add a group to a user, the usermanager shows only 25 of our 55 groups. How can i change this? Thanks!

**Solution:** That's a known bug. Please download the latest sources of REL1\_23 from  
[https://extdist.wmflabs.org/dist/extensions/BlueSpiceExtensions-REL1\\_23-d78d922.tar.gz](https://extdist.wmflabs.org/dist/extensions/BlueSpiceExtensions-REL1_23-d78d922.tar.gz)  
[https://extdist.wmflabs.org/dist/extensions/BlueSpiceFoundation-REL1\\_23-e0a5c4e.tar.gz](https://extdist.wmflabs.org/dist/extensions/BlueSpiceFoundation-REL1_23-e0a5c4e.tar.gz)

**Error:** Thanks, but when i copy these folders into my folder, i lost all my groups and namespaces. Fortunately i had a backup. How can i prevent this?

**Solution:** That should not happen as the "BlueSpiceFoundation/config" folder is not in the sources. Make sure this folder gets not overwritten.
