

FAQ:WikiEditor

Error: Just installed the new BlueSpice on my mediawiki. Everything seems to work but on the editing site I get real strange icons.

Solution: "Just delete or uncomment in /resources/src/mediawiki.action/mediawiki.action.edit.toolbar/mediawiki.action.edit.toolbar.less this lines: mw-editbutton-bold {

```
.background-image("images/@{button-bold}");
```

```
} mw-editbutton-italic {
```

```
.background-image("images/@{button-italic}");
```

```
} mw-editbutton-headline {
```

```
.background-image("images/@{button-headline}");
```

```
} mw-editbutton-signature {
```

```
.background-image("images/@{button-sig}");
```

```
} "
```
