## Features

---

## Description

---

**BlueSpiceMultiUpload** enhances the experience of uploading files to the wiki, with fast and seamless interface.

## Usage

---

By clicking on the "Upload file" link in the left navigation, a dialog will open prompting to select files to upload. Multiple files can be selected.

After confirming selection of files, an upload dialog will appear, in which additional data about files being uploaded can be added, like:

- namespace to upload to
- category to attach to the files
- descriptions ...

All settings are optional.

After configuring the settings, click on "Done" button to upload the file(s). Progress bar will appear, showing the progress of the file upload. In case there is an error with one or more of the files being uploaded, dialog will be expanded the show the problematic files.

After all files are uploaded, dialog can be closed, completing the process.
