Description

Avatars handles profile images of wiki users. Every user has an automatically generated avatar created or can upload his personal image.

Usage / Features

This extension adds an option to each user's page to change his profile image. At the top of a user's page users can see their current profile image and the link "Userimage". Clicking on this link opens a dialog offering several options for setting a profile image:

- A new image can be uploaded.
- A image has already been uploaded to the wiki, or an image from the web (through URL) can be used.
- A new avatar can be generated.

Technical information

Configuration

In the [Config Manager](#) generator used to create the avatars can be changed. The options are

- InstantAvatar - random, image contains initials of user's name.
- Identicon - not random, represent a visual value of a user's IP address.

Rights (permissions)

This extension does not require any special rights. User must have "read" permission in order to change his profile image.

Requirements

This extension requires [BlueSpiceFoundation](#).

Upload function must be enabled on the wiki.

User manual

For detailed description and usage please visit our [user manual](#).
