3.0.1	January 17, 2019
3.1.0	September 19, 2019

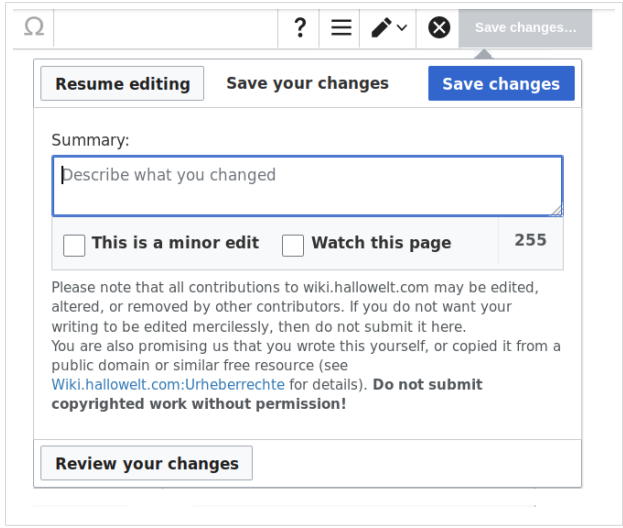

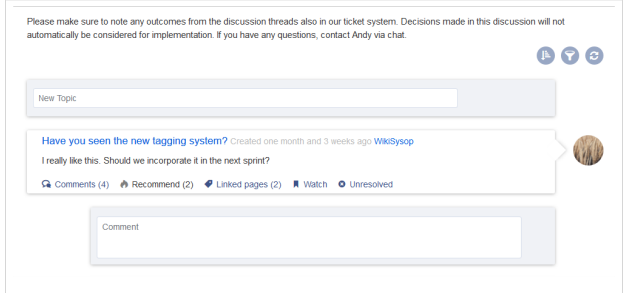

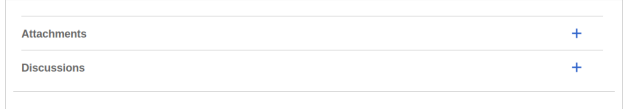

Important new functions in 3.1

The most important changes in BlueSpice 3.1 at a glance:

Feature	Description	Screenshot
Completely redesigned title section		
Focus on convenience	See and modify relevant page information at a glance	
Category handling	Categories are now shown in the title section and can be edited	
Quality management	State of a page is displayed and can be changed	
Page neighborhood	Subpages and related pages are shown in a breadcrumb navigation and can be easily be explored	
UX improvements		

Feature	Description	Screenshot
UX audit	Many improvements in iconography, labeling and navigation	
Page load masks	Indicator for system activity to create a smoother experience	
Fullscreen mode	Switch the wiki to full screen for more space	
Search		
Better scoring	Several tunings to provide a more natural search result order. E.g. base names have preference over subpages	
Flexible autocomplete	It is now possible to use multiple infixes. E.g. search for "func test" results in Functional Design /Testplan	
Similar pages	Pages with similar terms can be found in the page information flyout	
VisualEditor		

Feature	Description	Screenshot
File handling	It is now easier to insert or upload files directly with the Visual Editor. The upload dialog recognizes the file type and shows the corresponding options for upload.	
Table formatting	Change the width and height of cells and apply various stylings	
Text colors	Add colors to words and table backgrounds	

Feature	Description	Screenshot
Convenience	Less clicks in file and save dialogs	
Timeline		
Integrated discussion page	Both classical wiki text and threaded discussions are stored on one page	
One step creation	Attachment and discussion sections can now be created in one click
