FlaggedRevs

Semantic

- After adding the namespace, the new namespace is displayed after pressing the "f5" key.
2. Create the necessary **groups** on the page `Special:GroupManager` :

- HR_visitor: Users in this group have only view permissions to the (HR:) namespace
 - HR_editor: Users in this group can create and edit pages in the (HR:) namespace
 - HR_reviewer: Users in this group can, additionally, approve documents. For this to work, the function "FlaggedRevs" is activated for the namespace. These groups are initially "empty".
3. Assign **roles** to each group on the page `Special:PermissionManager`. After this, each group has specific sets of permissions:
1. The group HR_visitor:

The administrator selects the group "HR_visitor" and checks the Role "reader" only in the HR namespace. Since the reader role in the HR namespace is now assigned to the group "HR_visitor", all other groups no longer have any view permissions for this namespace:

Blocked by HR_visitor

2. The group HR_editor: The administrator selects the role editor only in the namespace HR. Since the editor role does not inherit all permissions from the reader role, the administrator also has to check the reader permissions in addition:

3. The group HR_reviewer: The administrator selects the role of reviewer only for the namespace HR. Since the roles HR_visitor and HR_editor have been reserved for the groups HR_visitor and/or HR_editor before, the editor and reader permissions have to be granted as well:

4. **Add users** to the correct user groups: Since Anna needs to be able to edit and approve the documents both in the HR and in the Main namespace, she has to be added to both the "HR_reviewer" and the standard "reviewer" groups:

Cancel Add user Done

Username: AMiller

Password: ●●●●●●●●●●

Confirm password: ●●●●●●●●●●

Email: amiller@bestspices.com

Real name: Anna Miller

Enabled:

Groups: Type to filter...

- HR_reviewer (HR_reviewer)
- Reviewers (reviewer)

The administrator also adds the other affected users to the correct groups. The result is the following permissions configuration:

user	is in groups	roles in namespace HR	roles in namespace Main	description
Anna (HR manager)	HR_reviewer reviewer	reviewer reader editor	reviewer reader editor	Anna can now read, edit and approve pages in both the HR and the Main namespaces.
Phil (HR specialist)	HR_editor editor	reader editor	reader editor	Phil can now read and edit pages in both the HR and the Main namespaces
Edith (CEO)	HR_viewer editor	reader	editor	Edith can now read pages in the HR namespace and edit pages in the Main namespace.
Lea (Legal advice)	HR_viewer	reader	-	Lea can only read pages in the HR namespace.
All employees	reader	-	reader	All employees can read pages in the Main namespace. They cannot read the pages in the HR namespace.

In addition, the administrator should ensure that Anna is not the only person who can approve content. Otherwise there would be a problem when Anna is on vacation or has no time for reviewing page edits.
