

BlueSpice 2.27.0 Notable New Features

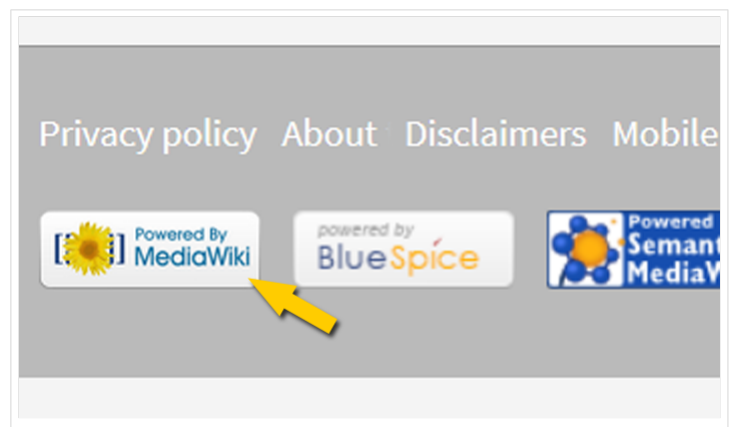

BlueSpice 2.23.3 is a minor and maintenance version. Consult the [Release Notes](#) for the full list of changes. The 2.23.3 beta release was published on Tuesday, 10th May 2016. Download the release from [Sourceforge](#).

Notable new features

BlueSpice API: There is now a standardized API for many BlueSpice actions.

main	{ } Examples
action=bs-groupmana...	action
format=php	Which action to perform.
	format
	The format of the output.
	maxlag

Compatibility: BlueSpice can now be used with MediaWiki 1.27.

ContextMenu: The extension is now enabled by default.

New development

Blog 2

5 days and 23 hours ago - **WikiSysop**

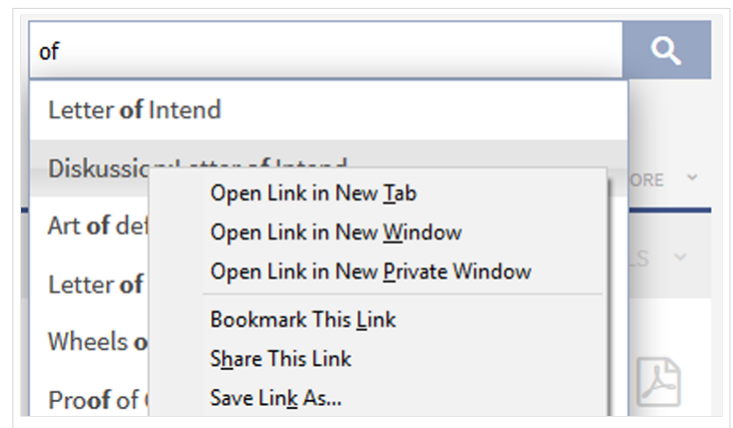

Dashboards: There is a wiki page portlet, which allows you to use any wiki page as a dashboard item.

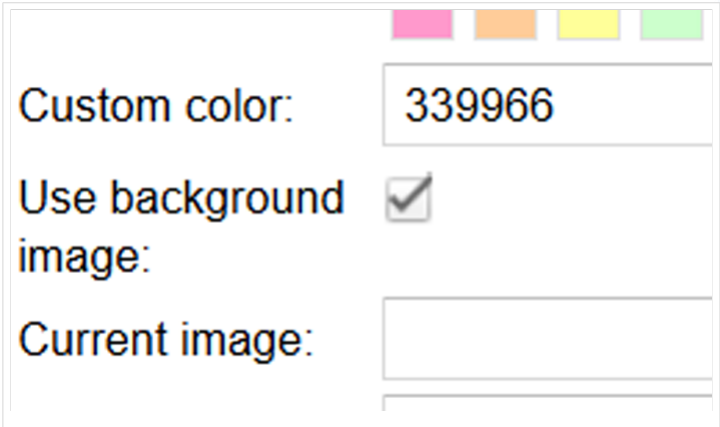

ExtendedSearch: Introduces facet operators, which indicated whether multiple selections in a facet should be combined using AND or OR logic.

ExtendedSearch: It is possible to open articles in the autocomplete list in new windows or tabs.

Flexiskin: It is now possible to disable the background image.

Custom color: 339966

Use background image: ☒

Current image:

GroupManager: Raised group name character limit to 255 (was 16).

New group

Group name: much_more_characters_possible_than_in_the_last_vers

Ok Cancel

InsertMagic: Tag descriptions are now much more descriptive.

Insert magic word or tag

1. Choose tag or magic word

Tags

- blog
- blogmore
- blogtime
- booklist
- bookmeta

2. Modify code

<bs:blog />

Description

Includes a weblog of article, discussion and file pages. Can be specified by various parameters. These can be combined in any order.

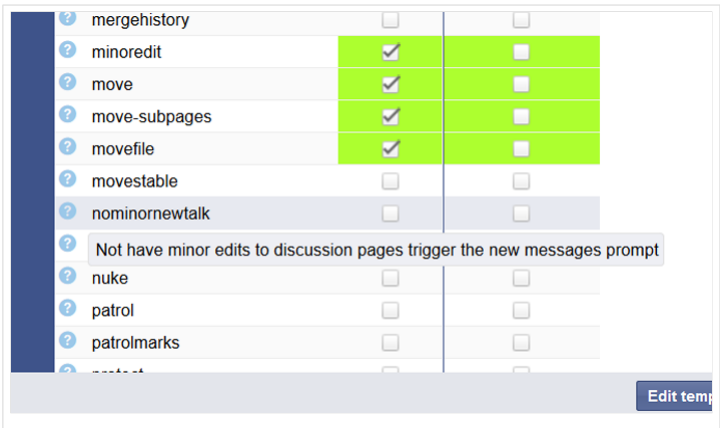

Examples

<bs:blog count="5" cat="Wiki" newentryfieldposition="bottom" />

Edit temp

Upload: XML and SVG files can now be uploaded by default.

htm, xltx, ppt, pot, pps, pptx, pptm, potx,
z, gz, bzip2, 7zip, xml, svg, png, gif, jpg, jpeg.

UserMerge: Added extension to Distribution. Merge two users into one.

Merge and delete users

Username to merge

Old user (merge from):

New user (merge to):

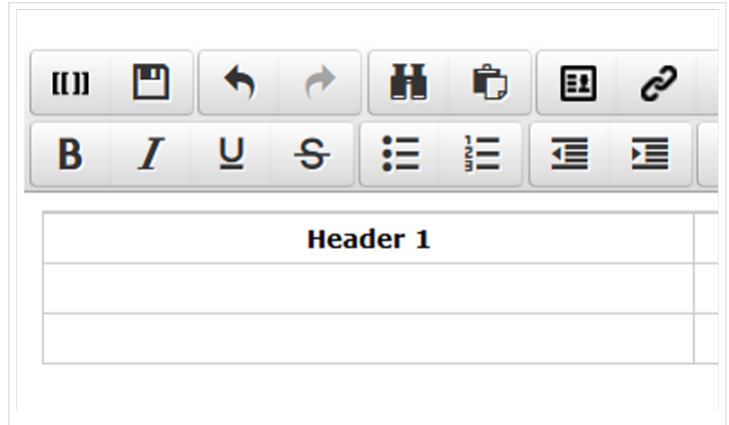

☐ Delete old user

Merge user

UserSidebar: There is now a "global actions" navigation tab for every user.

The screenshot shows the BlueSpice UserSidebar on the left with a 'GLOBAL ACTIONS' tab highlighted by a yellow arrow. The sidebar lists various actions: Upload file, File list, Watchlist, Special pages, Review, Book Manager, Extended statistics, Ratings, Reminder, and WikiExplorer. On the right, the 'Extended search' interface is shown with a search bar containing 'Office'. Below the search bar, it indicates 'Search for "Office" found 91 results.' and provides a link to 'Create page "Office"'. A pagination bar shows '1 - 25 out of 91 results' with page numbers 1, 2, 3, 4, and a 'Next' button. Below the pagination, there are filters for 'Namespace' (checked), '(Pages) (80)' (checked), 'Benutzer (3)' (checked), and 'Archiv (7)' (unchecked). A preview of a document titled 'PDF und Office' is visible at the bottom right.

VisualEditor: Set default style for table to contenttable. This makes much nicer tables.
