Manual:Extension/BlueSpiceArticlePreviewCapture
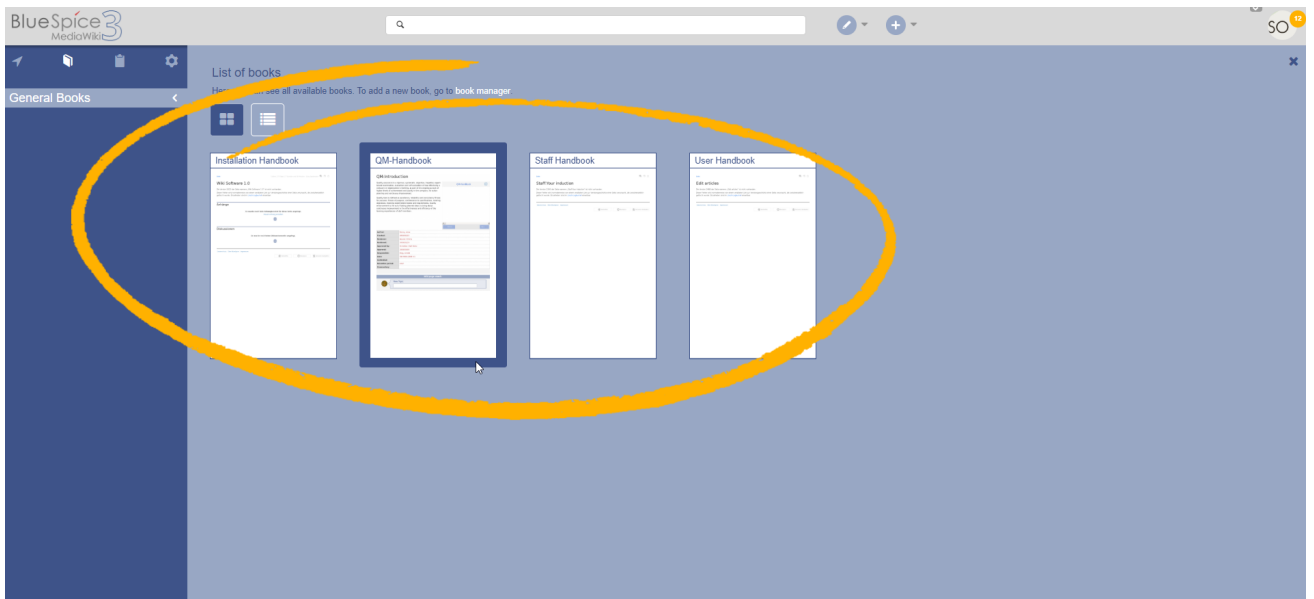

Contents

What is BlueSpiceArticlePreviewCapture?

BlueSpiceArticlePreviewCapture provides ability to show current snapshots of wikipages to be shown as thumbnails throughout the wiki.

Where is BlueSpiceArticlePreviewCapture used?

Thumbnail snapshots of various pages are used in many places on the wiki, like:

- `Special:SearchCenter` - to show previews of pages in search results
- Recent changes flyout
- Book manager flyout ...

Underlying technology

BlueSpiceArticlePreviewCapture relies on PhantomJS to render the thumbnails.
