Description

The **BlueSpiceAuthors** extension displays all users who have contributed to a wiki page. They are listed on the *Page information*, which can be accessed from the [Quality management tools](#).

Usage / Features

The section *Authors of this page* on the *page information* contains the [profile picture](#) as well as the name and the type of change an author made.

If users are not registered or were deleted since they made the contribution, an image with a yellow question mark is displayed.

Hovering over the profile picture shows the user name. The image links to the user's profile page.

Technical information

Configuration

If authors should be shown on the page information or not can be set globally in the [Config manager](#).

This can also be achieved for a single page by placing the behaviour switch on the page.

Rights (permissions)

This extension does not require any special rights. All users with *read* permissions can also see the authors of a page.

Requirements

BlueSpiceAuthors requires [BlueSpiceFoundation](#) and [BlueSpiceAvatars](#).

User manual

For detailed description and usage, visit our [user manual](#).
