## Summary

**Draw.io** offers extensive drawing possibilities for process flowcharts, infographics and other visualizations on a wiki page. Descriptive graphics like process chains or decision trees can be constructed directly on a wiki page.

## Inserting a chart

### To insert a drawing with VisualEditor:

1. **Create or choose** a page where you want to insert a drawing.
2. **Select** *Insert > Magic word* from the editor toolbar.
3. **Choose** *drawio* from the list of magic words.
4. **Click** *Done*. This opens a dialog box. Enter a name for your drawing.
5. **Click** *Insert*.

- This inserts the following tag in your source code `{{#drawio:Name_of_the_flowchart}}`
6. **Save** the page.

## Editing the drawing

---

1. **Click** *Edit* on the saved page above the drawio placeholder to open the draw.io editor. For the best editing experience, set your wiki into full-screen mode using the toggle button in the main toolbar. You can now edit your drawing.

2. **Click** *Save* in the draw.io window to save your drawing.
3. **Click** *Exit* next to the Save button in the draw.io window to close the draw.io editor.

## Using draw.io with image maps

---

Draw.io creates a versioned png-file in the *File* namespace. This means that every change of the flowchart that was concluded by *Save* will create a new, updated version of this png-file. You can integrate this file on another page in your wiki or create an **image map**.
