Features

Contents

Description

With **RatedComments** users can rate articles and comment their own ratings.

Usage / Features

- An article can be reviewed. This consists of a rating, a title and a text.
- The average of all ratings is displayed at the top of the StateBar.
- Each user can only submit a review.
- Own reviews can be deleted and edited by the user and the admin.
- A review may be marked as helpful or unhelpful.
- Each user can rate a review only once for their helpfulness.

Technical information

Configuration

Some aspects of this extension can be configured on Special:BlueSpicePreferences, under section "Rated comments". Here wiki administrators can configure:

- Namespaces in which rated comments will be enabled.
- Maximum length of a message.
- Maximum length of a message title.
- Number of comments.

Rights (permissions)

Users must have "ratedcommentsedit" permission to change ratings of a comment, as well as permissions for Shoutbox extension to view/edit comments, and permissions for Rating extension.

Requirements

RatedComments requires BlueSpiceFoundation, Shoutbox and Rating.
