BlueSpiceUEModulePDF enables the output of a wiki page as Adobe Portable Document Format (PDF).

Usage / Features

The user chooses an export function in the widget bar:

- Single page
- Single page with linked pages
- Single page with subpages

Technical information

Configuration

Administrators can change the following setting in the [Configuration manager](#), under Function>Export or Extension>BlueSpiceUEModulePDF. Here wiki administrators can configure:

- *Hide namespace prefix in PDF*: The namespace is not shown for page titles in the PDF.

The wiki page can be printed to PDF in landscape format by adding the following tag anywhere in source view:

```
<bs:ueparams template="BlueSpice_Landscape" />
```

Rights (permissions)

This extension does not require any special rights.

Requirements

UEModulePDF requires [BlueSpiceFoundation](#) and [UniversalExport](#).

More info

For a detailed description, visit the [help page](#).

Demo

You can try out the PDF export on any page in our [BlueSpiceDemo](#).
