Description:	Provides batch uploading of files		
State:	stable	Dependency:	BlueSpice
Developer:	HalloWelt	License:	GPL v3 only
Type:		Category:	Administration
Edition:	BlueSpice pro		
View help page			

Features

BlueSpiceMultiUpload enables users to seamlessly upload multiple files to the wiki.

Usage / functionality

By clicking on the *Upload file* link in the main navigation, the operating system's upload dialog opens. Multiple files can be selected.

After confirming the selection of files, a wiki upload dialog appears. Here, it is possible to add additional data such as:

- the namespace to upload to,
- category to attach to the files, and
- file descriptions.

All settings are optional.

After configuring the settings, click on *Done* to upload the file(s). A progress bar shows the status of the file upload. If there is an error with one or more of the files, the dialog will be expanded to show the problematic files.

After all files are uploaded, the dialog can be closed.

Technical Information

Configuration

There are no additional configuration options.

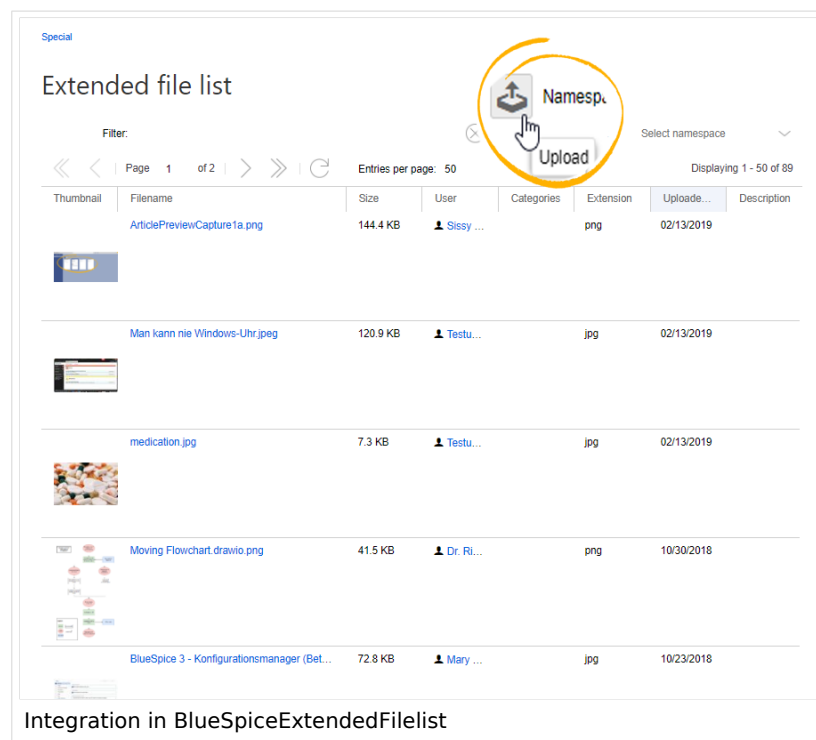

Rights (permissions)

This extension does not have any separate rights.

Requirements

This extension requires BlueSpiceFoundation.

Integration with other extensions

BlueSpiceMultiUpload also integrates into other extensions, like [BlueSpiceExtendedFilelist](#) (accessible from `Special:ExtendedFilelist`), where an upload button is added above the file grid, providing the same functionality as described above.

More info
