State:	stable	Dependency:	BlueSpice
Developer:	HalloWelt	License:	GPL v3 only
Type:	BlueSpice	Category:	Editor
Edition:	BlueSpice free		
View help page			

Features

BlueSpiceInsertLink offers a dialogue to insert links without using wiki code.

Usage / Features

If you are already in the edit mode, you find the function *InsertLink* in the editor toolbar. Click on the menu item to open the dialog box. If you want to delete a link, click on the link and click the red "remove"-icon in the dialog box that appears.

Users can link the following targets:

- other wiki pages
- external websites
- files uploaded to the wiki
- files on a network drive

These functions do not just save you time working with wiki code, but also present you with a list of existing articles in the wiki for you to choose from. If the page you are trying to link to doesn't exist (yet), a red note will be shown.

Technical information

Configuration

There are no configuration options for this extension.

Rights (permissions)

This extension does not require any special rights. Users must have "edit" permission to be able to insert a link.

Requirements

This extension requires [BlueSpiceFoundation](#).
