

Setup:Installation Guide/System Preparation/Windows /Introduction

A [quality version](#) of this page, [approved](#) on *25 June 2020*, was based off this revision.

To make sure your BlueSpice installation is successful, we show you how to prepare a complete Windows Server environment before running BlueSpice on it.

The documentation is as detailed as possible and illustrated with screenshots.

Nevertheless, we assume that you already have some previous experience in the installation and operation of Windows Server systems.

Prerequisite is an already installed Windows Server from version 2012 without already additionally installed software.

First start with [Installing the IIS Web Server](#).
