**FilterableTables** applies a filterable and sortable table layout to regular content tables in wiki articles.

## Setting the filter option

To create the table filter, the CSS class "filterable" is added to the table.

## Using VisualEditor

In edit mode, click on the table to open the options popup and click on "Properties". In the dialog that opens, toggle on "Filterable" option.

The left screenshot shows a table with four columns (Heading 1-4) and four rows (Cell 1-12). A 'Table' popup is open below the table, and the 'Properties' button is circled in orange. The right screenshot shows the 'Table properties' dialog with various options like 'Caption', 'Styled (wikitable)', 'Sortable', 'Collapsible', 'Collapsed Initially', 'Exportable', and 'Filterable'. The 'Filterable' toggle switch is turned on and circled in orange.

## Using Wikitext

The screenshot shows the Wikitext editor with a table definition. The first line of the table definition is `{| class="wikitable filterable"`, where the `filterable` part is circled in orange. The rest of the table definition follows standard Wikitext syntax for headings and cells.

In source-editing mode, add the class "filterable" to the table header.

```
{{ class="wikitable filterable"
|+
!Heading 1
...
}}
```

## Filtering tables

The special filter layout of a table is only applied in view mode.

To filter the values in the table, click on the header of the column to filter and select "Filter" from the dropdown menu. In the input field that opens, type in the filter text.

The screenshot shows a page titled "Test" with a table containing four columns: "Heading 1", "Heading 2", "Heading 3", and "Heading 4". The first row contains "Cell 1", "Cell 2", "Cell 3", and an empty cell. A dropdown menu is open over the "Heading 3" column, showing options: "Heading 4", "Sort Ascending", "Sort Descending", "Columns", and "Filters". The "Filters" option is selected, and a search input field with the number "3" is visible. A yellow circle highlights the dropdown menu and the search input field.

Below the table, there is an "Attachments" section with the message "No attachment area has been created yet." and a "Create new attachment area" button. Below that is a "Discussions" section with a "New Topic" input field.

Applying a table filter

**Note:** Any table styles that are applied by the table class are ignored as long as the value "filterable" exists in the class rule. A filterable table comes with its own table styling.
