Description

PastelImage allows users to include images in an article, either via Drag&Drop, or by copying it from the clipboard.

No complicated code necessary.

Usage / Features

- Works in the WikiCode view and in the visual editor.
- There are two ways to insert a picture:
 - Drag and Drop: drag and drop from the file explorer into a drop area.
 - Copy + Paste: Copy the image in the file browser via Ctrl + C to the clipboard and then paste it into the visual editor via Ctrl + V in the browser.

Technical information

Configuration

Some aspects of this extension can be configured on Special:BlueSpicePreferences, under section "Paste image". Here wiki administrators can configure:

- Default file extension if none is specified.

Rights (permissions)

Users must have "edit" permission, as well as "upload", "reupload" and "reupload-shared" permissions for target namespace.

Requirements

PastelImage requires [BlueSpiceFoundation](#).

PastelImage uses Java for the "Copy & Paste" functionality. So for using this feature, Java 1.7 or higher is required. Please keep your Java version up-to-date.
