

Manual:Extension/BlueSpiceSocialMicroBlog

A [quality version](#) of this page, [approved](#) on *17 July 2020*, was based off this revision.

Microblogs work exactly like regular blogs. Unlike blogs, however, they do not have a separate title field. Users simply provide a quick message in a single text field.

Microblog syntax

To include a microblog on a page, copy the following tag. An explanation of the individual paramters is available on the [help page for blogs](#):

```
{{#tag:bs:timeline|
{
  "showentitylistmenu": false,
  "preloadedentities": [{
    "type": "microblog"
  }],
  "headlinemessagekey": "Letzte Kurznachrichten",
  "showheadline": false,
  "limit": 3,
  "sort": [ {
    "property": "timestampcreated",
    "direction": "DESC"
  }
  ],
  "lockedfilternames": [
    "type"
  ],
  "outputtypes": {
    "microblog": "Default"
  },
  "filter": [ {
    "type": "list",
    "property": "type",
    "value": [ "microblog" ],
    "comparison": "ct"
  }, {
    "type": "boolean",
    "property": "archived",
    "value": false,
    "comparison": "eq"
  }
  ]
}
}}
```

This produces a microblog that looks like this:

The screenshot displays a 'Content' editor at the top with a rich text toolbar containing icons for undo, redo, list, bold, italic, link, unlink, and a menu. Below the editor is a 'Post' button. The main content area shows a post by 'Maria Prüfling' with the text 'How long are we still supposed to be working from home. Is there any new info available?'. Below the post are interaction options: 'Comments (3)', 'Recommend (0)', 'Linked page (1)', and 'Unwatch'. A 'Comment' input field is provided. Two comments are shown: one by 'Maik Kalb' stating 'At this point it's only anecdotal info! Stay tuned...' and another by 'Maria Prüfling' stating 'Okay, weil ich gehört habe, dass wir ab nächste Woche wieder ins Office zurückkehren.'.

Microblog with open text input field
