

Reference:BlueSpiceSocialTopics

Extension\ : BlueSpiceSocialTopics

Overview			
Description:	Topic and discussion entities for BlueSpiceSocial		
State:	stable	Dependency:	BlueSpice
Developer:	HalloWelt	License:	GPL v3 only
Type:		Category:	Communication
Edition:	BlueSpice pro		

Features

SocialTopics provides the SocialEntity types *discussion* and *topic*.

Usage / features

At the bottom of each content page, the social entities associated with the page are displayed, filtered by the *topic* type.

The discussion page is completely replaced by the page view of the SocialEntity type *discussion*. It displays a timeline that lists the social entities of type *topic* that belong to this discussion. In addition, free text can be entered at the beginning of the discussion page just like on a standard MediaWiki discussion page.

Technical information

Entry fields for dialogs

Name	DescriptionD	Type	Default value
discussiontitleid	ID of the page to which the discussion topic belongs	integer/choice field	current discussion page
topicitle	Title of the discussion topic	str	empty
text	Content of the discussion topic	WikiText or reduced VisualEditor; reduzierter parser scope	empty

Behavior switch

Name	Beschreibung
<code>__NODISCUSSION__</code>	Diskussionen werden auf der seite ausgeblendet

Configuration

Name	Description	Type	Default value	Scope
<code><i>bsg</i>SocialTopicsTalkPageAutoCreate</code>	Discussion pages are automatically created with a new page. Activating this option si not recommended, because a lot of pages will be created.	bool	false	ConfigManager
<code><i>bsg</i>SocialTopicsTimelineAfterContentNamespaceBlackList</code>	Determines in what namespaces the timeline with the latest discussion topics should not be shown.	array	[]	LocalSettings.php
<code><i>bsg</i>SocialTopicsTimelineAfterContentShow</code>	Determines if the timeline with the latest discussion topics should be shown at the bottom of a page.	bool	true	LocalSettings.php

Rights (permissions)
