| For more info, visit <a href="#">Mediawiki</a> . |                                                    |             |                         |

## Features

**SyntaxHighlight** adds customizable syntax highlighting functionality.

It is powered by the Pygments library and supports hundreds of different programming languages and file formats.
