

## Reference:Variables

### Extension\ Variables

| Overview                                         |                                                                                       |             |               |
|--------------------------------------------------|---------------------------------------------------------------------------------------|-------------|---------------|
| Description:                                     | Parser functions allowing to work with dynamic variables in an article scoped context |             |               |
| State:                                           | stable                                                                                | Dependency: | MediaWiki     |
| Developer:                                       | Rob Adams, Tom Hempel, Xiloynaha, Daniel Werner, MGChecker                            | License:    | ISC           |
| Type:                                            | MediaWiki                                                                             | Category:   | Data Analysis |
| Edition:                                         | BlueSpice free                                                                        |             |               |
| For more info, visit <a href="#">Mediawiki</a> . |                                                                                       |             |               |

### Features

The **Variables** extension allows you to define a variable on a page, use it later in that same page or included templates, change its value, possibly to a value given by an expression in terms of the old value, etc.

For more information please visit [MediaWiki](#).
