

Manual:Using the Version History

Using the Version History

If you're especially interested in changes made to a certain article, you can access a list of all changes done to it by looking at its *version history*. Here you will find all older versions of the article in chronological order.

The screenshot shows the 'Revision history of "QM:Preparing an offer"' page. At the top, there is a link 'View logs for this page'. Below it is a 'Browse history' section with filters: 'From year (and earlier): 2017', 'From month (and earlier): all', 'Tag filter:', and a 'Deleted only' checkbox. A 'Show' button is present. Below the filters, there is a 'Diff selection' instruction: 'Mark the radio boxes of the revisions to compare and hit enter or the button at the bottom.' and a legend: 'Legend: (cur) = difference with latest revision, (prev) = difference with preceding revision, m = minor edit.' Below this is a 'Compare selected revisions' button. The main part of the screenshot is a list of revisions. Each revision line starts with a checkbox for selection, followed by a radio button for comparison, the date and time, the editor's name, and a list of links (talk, contribs, block). The list also shows the byte size change and a description of the edit. The first two revisions are highlighted with a green background. The first revision is by Sissy Oppermann on 09:06, 29 August 2016, adding documentation. The second revision is by Thomas Schnakenberg on 09:05, 29 August 2016, making a small addition to the first paragraph. The third revision is by Sissy Oppermann on 09:03, 29 August 2016, making small corrections. The fourth revision is by Sissy Oppermann on 11:58, 12 August 2016, adding a minor edit. The fifth revision is by Sissy Oppermann on 10:03, 12 August 2016, removing 6 bytes. The sixth revision is by Sissy Oppermann on 12:32, 10 August 2016, moving the page. The seventh revision is by Sissy Oppermann on 12:32, 10 August 2016, removing 446 bytes. The eighth revision is by Sissy Oppermann on 11:08, 10 August 2016, removing 1 byte. The ninth revision is by Sissy Oppermann on 10:33, 10 August 2016, removing 14 bytes.

Screenshot: A typical revision history list

You can also compare two versions to see the difference between them at a glance. Just choose two versions you want to compare and click on *Compare selected revisions*.

If necessary, you can also restore an older version of the article. To do so, find the version you want to restore and click on the corresponding date and time stamp. This will open the desired version of the article. Now click on *Edit* and save the article. Please note that this will also create a new version of the article in the version history.

If you only want to undo the last change to an article, simply click on the *undo* link in the corresponding line.

Where to find the Version History

You can access the version history of any article by clicking on the *History* link in the header.

BlueSpice pro offers additional functionality for the Version History with its extension *VisualDiff*. To learn more about it, click [here](#).
