InterwikiSearch allows simultaneously searching other BlueSpice wikis when performing a search on the wiki.

Usage

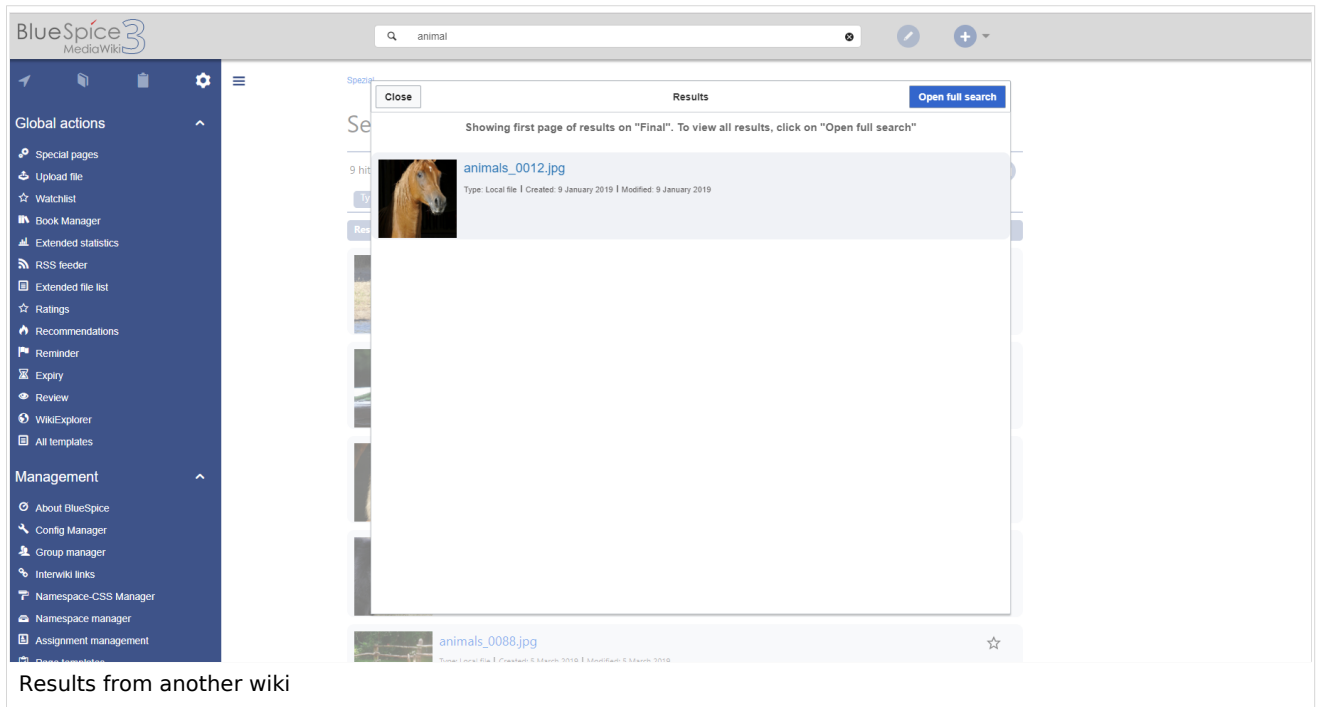

If BlueSpiceInterwikiSearch is enabled and configured on the wiki, every time user performs a search using the `Special:SearchCenter`, results from other wikis will be shown as well. Results from other wikis will be shown at the top of the page, below the filters, in form of Wiki name (number of results) buttons.

Results button for another wiki

Viewing results from other wikis

Clicking on a particular wiki's button will open a dialog containing the first page of the results, in order to enable a quick and easy way of visualizing the results. If the desired document is not listed on this page, the user can redirect to the target wiki and perform a full search on that wiki, by clicking on the "Open full search" button at the top right corner of the dialog. This will open the `Special:SearchCenter` on the target wiki, with the current search term already inserted.
