Using the context menu

Context menu opens when right clicking components that support ContextMenu functionality, namely, internal links and file links.

The context menu opens when you right-click on a component, such as a link or an image.

On internal links, the context menu display quick links for basic page actions, like:

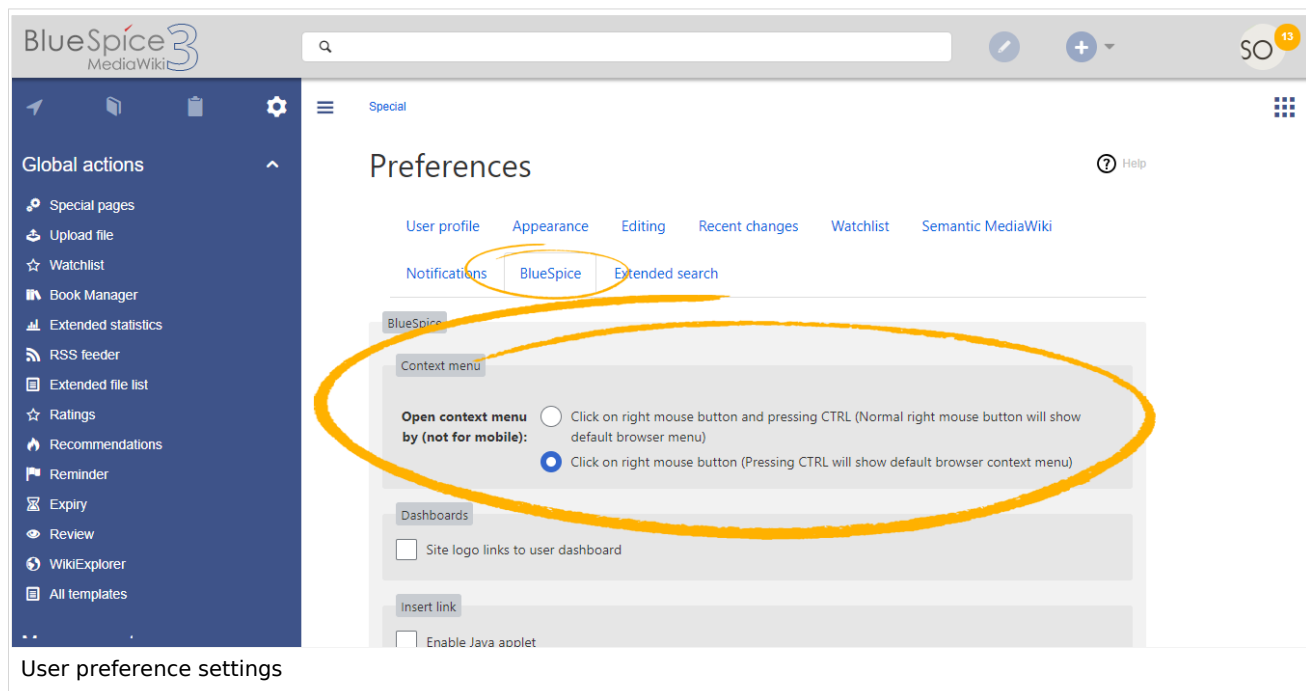

- Editing page
- Viewing page history
- Moving page
- Deleting page...

On file links, some additional options are shown, like:

- Opening file page
- Downloading file
- Uploading new version of the file
- Opening files using client application (when available)

Exact content of ContextMenu menu depends on the wiki configuration

Settings

Settings for the context menu are located in the user preferences (page *Special:Preferences*), under the "Appearance" tab. The setting is applied separate for each user.

The context menu has two modes:

- Click using the right mouse button and pressing CTRL (Normal right mouse button will show default browser menu)
- Click using the right mouse button (Pressing CTRL will show default browser context menu)
