<b>Edition:</b>	BlueSpice pro		
<a href="#">View help page</a>			

## Features

---

**SocialWikiPage** provides the SocialEntity types *wiki*page and *stash*.

## Usage / features

---

**Warning:** Pages in the namespaces *SocialEntity* and *User* are currently indexed by search engines by default. If you run a public wiki, you should [exclude these namespaces from being searchable](#) unless you want these pages to be indexed by public search engines.

- At the end of each content page, a list of the attachments to the current page is displayed
- A social entity of type *wiki*page is automatically created in the system for each content page.
- The page *Special:Attachments* allows you to create an attachment without going directly to the associated wiki page.

## Technical information

---

Entry fields for dialogs

Name	Description	Type	Default value
text	Content of the SocialEntity vof type <i>stash</i>	wikitext, managed OOjs-ui, InsertImage	empty
