

## PHP Warnings (XAMPP)

### Contents

<a href="#">1 Example of warning messages .....</a>	<a href="#">2</a>
<a href="#">2 How to hide warnings .....</a>	<a href="#">2</a>

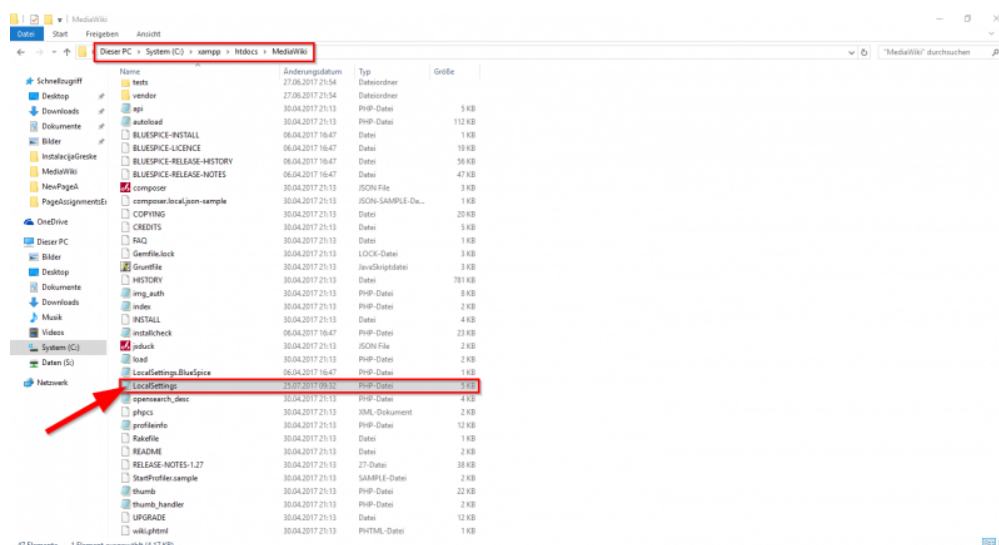

In the installation or sometimes in wiki, warnings can show up. To solve this follow the steps.

## Example of warning messages

## How to hide warnings

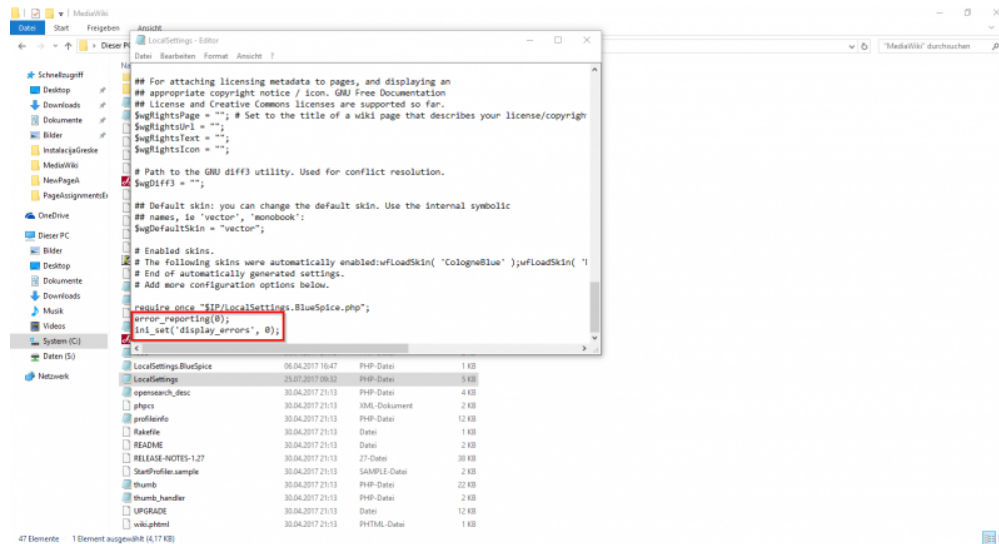

Open **your computer**, on **System C** go to folder **xampp**. In folder **xampp** you will find folder **htdocs**, in there find folder of your BlueSpice installation. In that folder you will find **LocalSettings** as image below shows:

Open **LocalSettings** and scroll down, on the end type:

```
error_reporting(0);  
ini_set('display_errors', 0);
```

like on the image bellow:

Save: **Ctrl + S**

This will hide PHP warnings.
