View help page			

Features

NamespaceManager allows to manage all [namespaces](#) in the wiki.

Usage / features

The NamespaceManager is visible for users with admin permissions. The following actions are possible

- Creating a namespace
- Editing a namespace
- Deleting a namespace
- Turning features for a namespace on or off :
 - [Subpages](#): Activates the use of subpages, which introduce some hierarchical organization into wiki pages.
 - [Content namespace](#): Contents from this namespace will be prioritized in the search results.
 - [Category check](#): Warns users on page save that a page has no associated category.
 - [Secured page assignments](#): Only assigned users can edit pages. By default, only users with *reviewer* or *admin* role can assign users. If pages are created by users with only edit rights, they cannot edit the new page after saving it unless they are later assigned to that page.
 - [Page templates](#): allows page templates to be used.
 - [Visual editor](#): activates VisualEditor.
 - [Rating](#): displays a star-based rating option with the page title.
 - [Recommendations](#): displays a recommendations icon next to the page title.
 - [Read Confirmation](#): users that are assigned to this page need to confirm when they have read the page.

- [Semantic MediaWiki](#): activates Semantic MediaWiki.
- [Approval](#): creates draft and approved versions of pages.
- Sorting, filtering, and exporting of the table grid

Technical Information

Configuration

This extension offers no configurations.

Rights (permissions)

Users must have the *namespacemanager-viewspecialpage* permission in order to change the namespace configuration.

Requirements

NamespaceManager requires [BlueSpiceFoundation](#).
