View help page			

Features

The extension **Privacy** allows users to maintain their privacy and enables site maintainers to comply with the GDPR.

Usage / features

It allows users to:

- Request anonymization: The requests are directed to a site administrator for approval. If approved, the user is anonymized by the system.
- Request removal: The requests are directed to a site administrator for approval. If approved, the user is deleted from the system with all their data.
- Retrieve all data stored about them in the system.
- Give and revoke consent to the privacy policy.

It allows site administrators to:

- Manage anonymisation and deletion requests.
- Get an overview of the privacy policy and cookie consent of all users.

Technical Info

Configuration

The following additional (optional) configuration settings are available. They can be adjusted or added in *LocalSettings.php*:

Setting	Functionality
<code>\$bsgPrivacyEnableRequests = true;</code>	Allows users to request anonymization or deletion of their data.
<code>\$bsgMatomoBlueSpicePrivacyIntegration = true;</code>	Adds an opt-out button for Matomo data analysis to the privacy settings dialog. This function requires the separate installation of the Matomo plugin AjaxOptOut in the <code>/plugins</code> folder of the installation.
<code>\$bsgPrivacyCookieAcceptMandatory = false;</code>	Deactivates the grey lock screen that disables the user interface until the cookie settings have been accepted.

Rights (permissions)

Assigns *bs-privacy-admin* permissions to a group, usually sysop.
