| Description:                   | Enables BlueSpice to manage and export hierarchical collections of articles. |             |                                                                                                                                                                                                                                 |
| State:                         | stable                                                                       | Dependency: | BlueSpice                                                                                                                                                                                                                       |
| Developer:                     | HalloWelt                                                                    | License:    | GPL-3.0-onlyProperty "BSExtensionInfoLicense" (as page type) with input value "</br>GPL-3.0-only" contains invalid characters or is incomplete and therefore can cause unexpected results during a query or annotation process. |
| Type:                          | BlueSpice                                                                    | Category:   | Book                                                                                                                                                                                                                            |
| Edition:                       | BlueSpice pro, BlueSpice Farm, BlueSpice Cloud                               |             |                                                                                                                                                                                                                                 |
| <a href="#">View help page</a> |                                                                              |             |                                                                                                                                                                                                                                 |

## Features

**Bookshelf** combines wiki pages to create books and also to export those pages as a PDF document.

## Usage/ Features

- Sets of different pages (chapters) can be put together individually to a book.
- The table of contents of the book is displayed in the left navigation bar.
- The chapters are displayed in a collapsible tree structure.
- The book or parts of the book can be exported to PDF.

## Technical information

---

### Configuration

Some aspects of this extension can be configured on `Special:BlueSpiceConfigManager`. Here, wiki administrators can:

- prepend the article table of contents and headlines of a page with book numeration.
- suppress the namespace prefix of book articles in the PDF output.
- apply the display title from the book source to a wiki page.

### Technical Information

---

This information applies to BlueSpice 3. Technical details for BlueSpice cloud can differ in some cases.

### Requirements

MediaWiki: 1.31

BlueSpiceFoundation: 3.1

### Integrates into

- BlueSpiceBookshelf

### Special pages

- Bookshelf
- BookshelfBookEditor
- BookshelfBookManager

### Permissions

| Name                                 | Description                                                          | Role   |
|--------------------------------------|----------------------------------------------------------------------|--------|
| bookshelf-viewspecialpage            | Access the special page <a href="#">Special:Bookshelf</a>            | reader |
| bookshelfbookmanager-viewspecialpage | Access the special page <a href="#">Special:BookshelfBookManager</a> | reader |

## Configuration

| Name                                             | Value                                          |
|--------------------------------------------------|------------------------------------------------|
| BookShelfDefaultCoverImage                       | 'resources/images/assets/coverimage/dummy.png' |
| BookShelfShowChapterNavigationPagerAfterContent  | false                                          |
| BookShelfShowChapterNavigationPagerBeforeContent | false                                          |
| BookshelfPrependPageTOCNumbers                   | true                                           |
| BookshelfSupressBookNS                           | true                                           |
| BookshelfTitleDisplayText                        | true                                           |

## User options

| Name                     | Value           |
|--------------------------|-----------------|
| bs-bookshelf-defaultview | 'gridviewpanel' |
