| Edition:                       | BlueSpice pro, BlueSpice Farm, BlueSpice Cloud            |             |                                                                                                                                                                                                                                |
| <a href="#">View help page</a> |                                                           |             |                                                                                                                                                                                                                                |

## Features

With **CategoryCheck**, pages cannot be saved unless a category is assigned to a page. This extension reminds a user to assign a category to a page before saving it.

This functionality can be assigned to a namespace in the [NamespaceManager](#).

## Technical Information

This information applies to BlueSpice 3 . Technical details for BlueSpice cloud can differ in some cases.

## Requirements

MediaWiki: 1.31

BlueSpiceFoundation: 3.2

## Integrates into

- [BlueSpiceVisualEditorConnector](#)

## Special pages

## Configuration

| Name                    | Value        |
|-------------------------|--------------|
| CategoryCheckNamespaces | array (<br>) |

## Hooks

- [BSApiNamespaceStoreMakeData](#)
- [BeforePageDisplay](#)
- [NamespaceManager::editNamespace](#)
- [NamespaceManager::getMetaFields](#)
- [NamespaceManager::writeNamespaceConfiguration](#)
