Features

BlueSpice **Player** is a video player that enables you to play all the usual HTML5 video formats in your wiki.

- Activated with the `<bs: showtime> Video.mp4 </ showtime>` tag
- Settings:
 - change the size
 - start the video immediately (autoplay)
 - play the video in a loop
- Supported formats: mp4, ogv, flv and webm
- It is possible to include multiple videos on one page
- In IE and flv, the HTML5 player falls back to a Flash version (default in VideoJS)
- For compatibility reasons, *bs: jwplayer* is also supported as a tag

In the user settings (Special:Preferences) under *Appearance*, users can set if the videos should start automatically.
