## Features

**SocialWikiPage** provides the SocialEntity types *wiki*page and *stash*.

**Warning:** Pages in the namespaces *SocialEntity* and *User* are indexed by search engines by default until version 3.1.13. If you run a public wiki with an earlier version, you should [exclude these namespaces from being searchable](#) unless you want these pages to be indexed by public search engines.

- At the end of each content page, a list of the attachments to the current page is displayed
- A social entity of type *wiki*page is automatically created in the system for each content page.
- The page *Special:Attachments* allows you to create an attachment without going directly to the associated wiki page.

## Technical Information

---

This information applies to BlueSpice 3 . Technical details for BlueSpice cloud can differ in some cases.

### Requirements

MediaWiki: 1.31

BlueSpiceFoundation: 3.2
