Features

SocialRating provides a rating system with recommendations for SocialEntities.

Warning: Pages in the namespaces *SocialEntity* and *User* are indexed by search engines by default until version 3.1.13. If you run a public wiki with an earlier version, you should [exclude these namespaces from being searchable](#) unless you want these pages to be indexed by public search engines.

This extension provides a button that allows to recommend certain types of social entities such as blog entries. It is not possible to recommend social entities of type *profile*.
