

# Setup:Installation Guide/System Preparation/Windows/Git

A quality version of this page, approved on 2 August 2021, was based off this revision.

#### Contents

1	Download	. 2
2	Installing Git	. 2
3	Next step	. 4

Git is an application for software version management. It is required for the installation of Node.js, which in turn is required for the operation of the rendering service "Parsoid" for the Visual Editor. The steps listed here are optional and only required if you want to use them in your BlueSpice installation.

### Download

In the Internet Explorer, open the official download page on git-scm.com (1). If the optimal download for your operating system does not start automatically, click on "64-bit Git for Windows Setup" (2):

Follow the further download instructions and download the installation package to your hard disk.

Please note that the download on your Windows Server with Internet Explorer only works if you have configured the Internet Explorer Advanced Security Settings in the Server Manager. Please refer to the technical documentation from Microsoft.

Git version 2.19.1 will be used below as an example. You can download the latest version of Git at the time of installation.

## **Installing Git**

Open the downloaded Git-2.19.1-64-bit.exe file.

Start the installation by clicking "Next >":

Blue Spíce MediaWiki

A status			

You can close the setup program now:

🚸 Git 2.19.1 Setup	– 🗆 X
	Completing the Git Setup Wizard
	Setup has finished installing Git on your computer. The application may be launched by selecting the installed shortcuts.
	Click Finish to exit Setup.
	Launch Git Bash
	View Release Notes
	Finish

## Next step

If you have completed all steps successfully, you can delete the previously downloaded file "Git-2.19.1-64-bit.exe" from your hard disk and go to the next step" Node. js".
