BlueSpice stores your content in a database for which you need to install a corresponding server. The steps listed here are required.

Introduction

Alternatively, you can use MySQL at this point, but we recommend the database server MariaDB as described below.

Download

In Internet Explorer, open the [official download page](https://downloads.mariadb.org/mariadb/) (1). Click on the corresponding download link (2).

Select the MSI package in the 64bit version:

File Name	Package Type	OS / CPU	Size	Meta
mariadb-10.3.13.tar.gz	source tar.gz file	Source	70.7 MB	Checksum Instructions
Galera 25.3.25 source and packages				
For best results with RPM and DEB packages, use the Repository Configuration Tool .				
mariadb-10.3.13-winx64-debugsymbols.zip	ZIP file	Windows x86_64	144.0 MB	Checksum Instructions
mariadb-10.3.13-winx64.zip	ZIP file	Windows x86_64	69.5 MB	Checksum Instructions
mariadb-10.3.13-winx64.msi	MSI Package	Windows x86_64	54.5 MB	Checksum Instructions
mariadb-10.3.13-winx32.zip	ZIP file	Windows x86	62.5 MB	Checksum Instructions
mariadb-10.3.13-winx32-debugsymbols.zip	ZIP file	Windows x86	111.9 MB	Checksum Instructions
mariadb-10.3.13-winx32.msi	MSI Package	Windows x86	49.1 MB	Checksum Instructions

Follow the further download instructions and download the installation package to your hard disk.

Please note that the download on your Windows Server with Internet Explorer only works if you have configured the Internet Explorer Advanced Security Settings in the Server Manager. Please refer to the technical documentation from Microsoft.

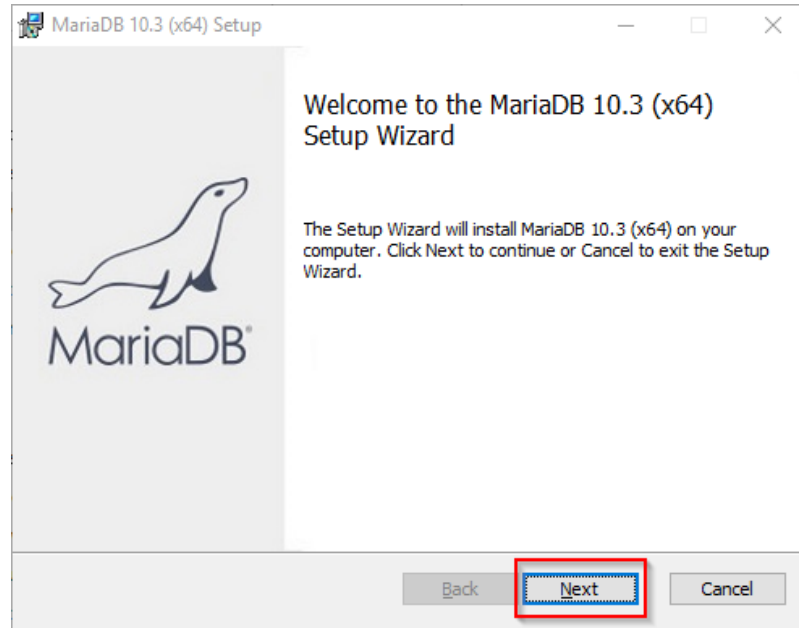

In the following the MariaDB version 10.3.13 is used and serves as an example only for the latest version, which you can download at the time of your installation.

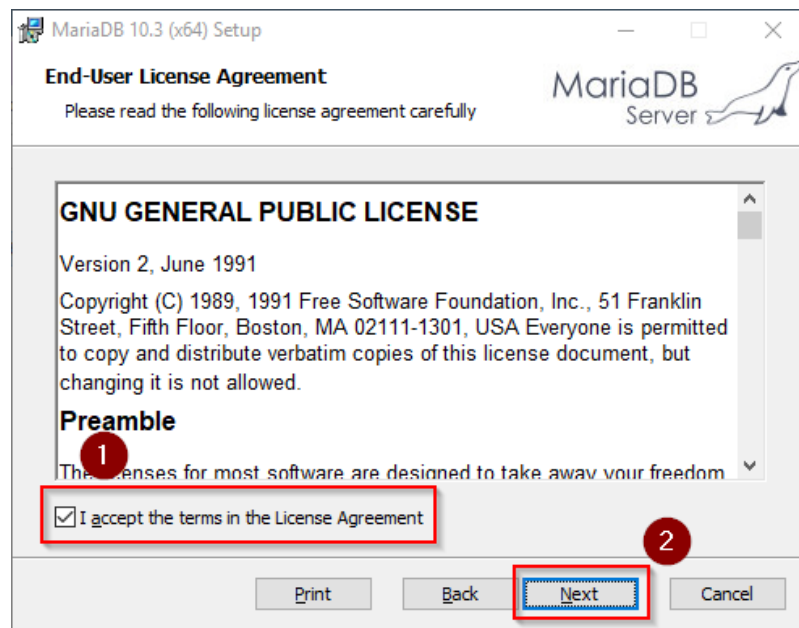

Installing MariaDB

Open the file that you just downloaded: "mariadb-10.3.13-winx64.msi".

Start the installation by clicking "Next":

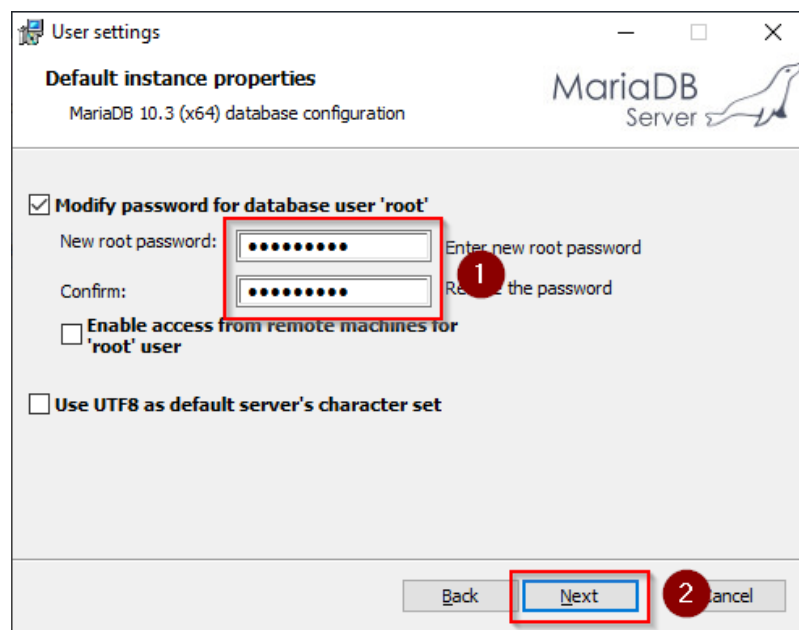

Confirm the license agreement (1) and click "Next" (2):

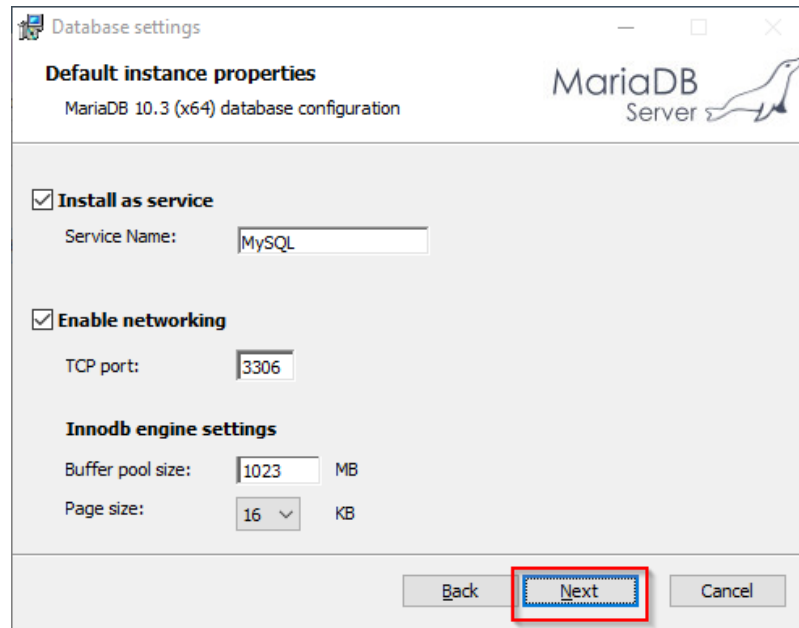

The next step you confirm by clicking on "Next".

Provide a password. It will be used for the administrative user ("root") of the database server (1).
Then, click "Next" (2):

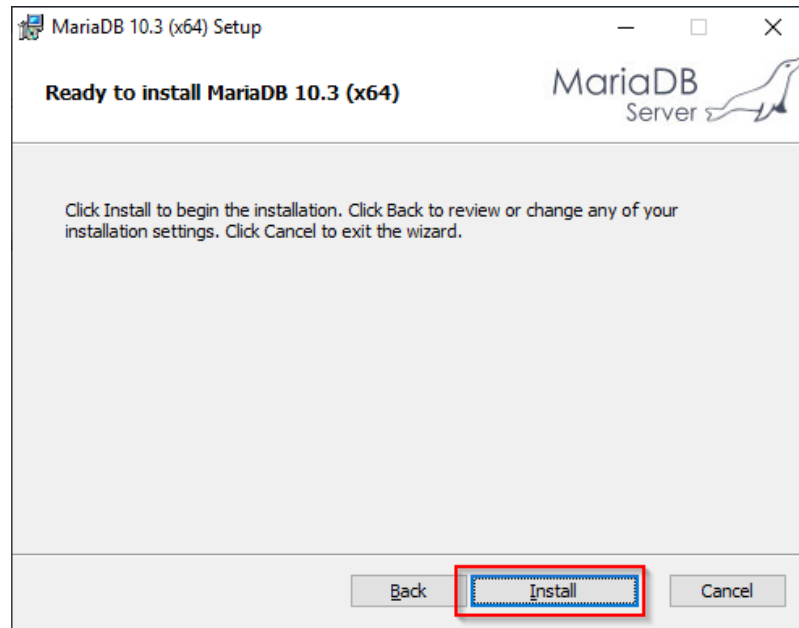

Confirm the next step by clicking "Next":

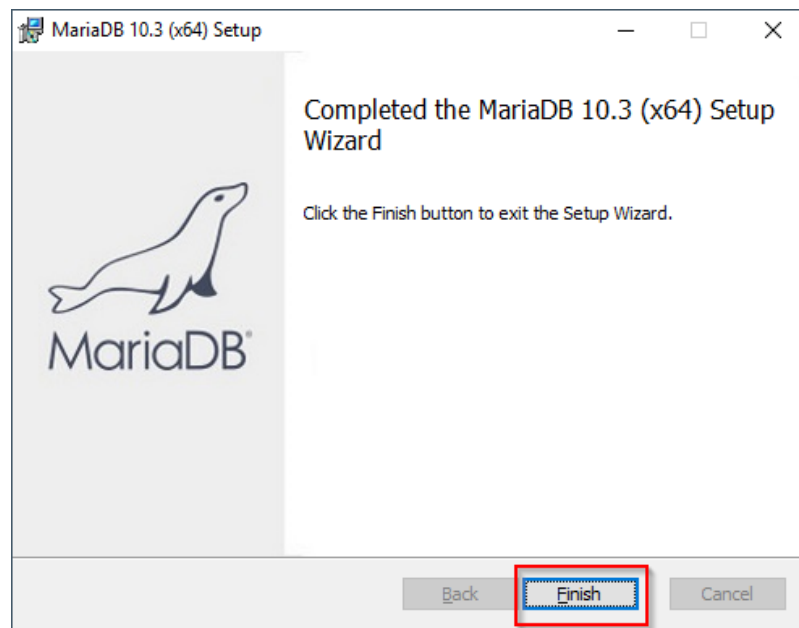

Confirm the next step by clicking "Next":

Now start the installation:

When the installation is complete, exit the installer:

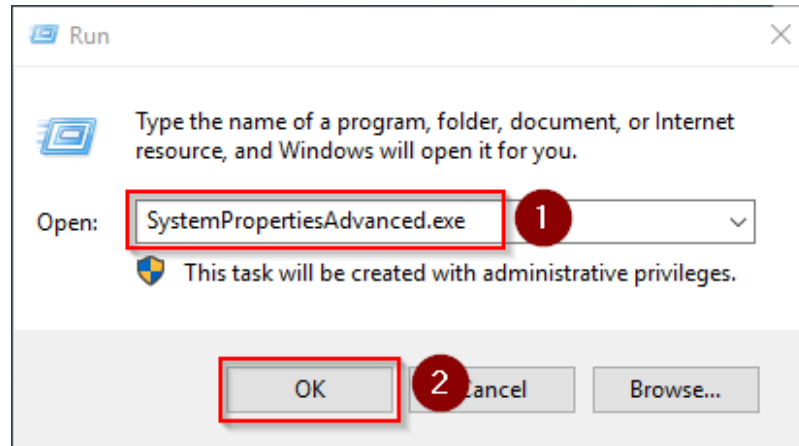

Setting the environment variable

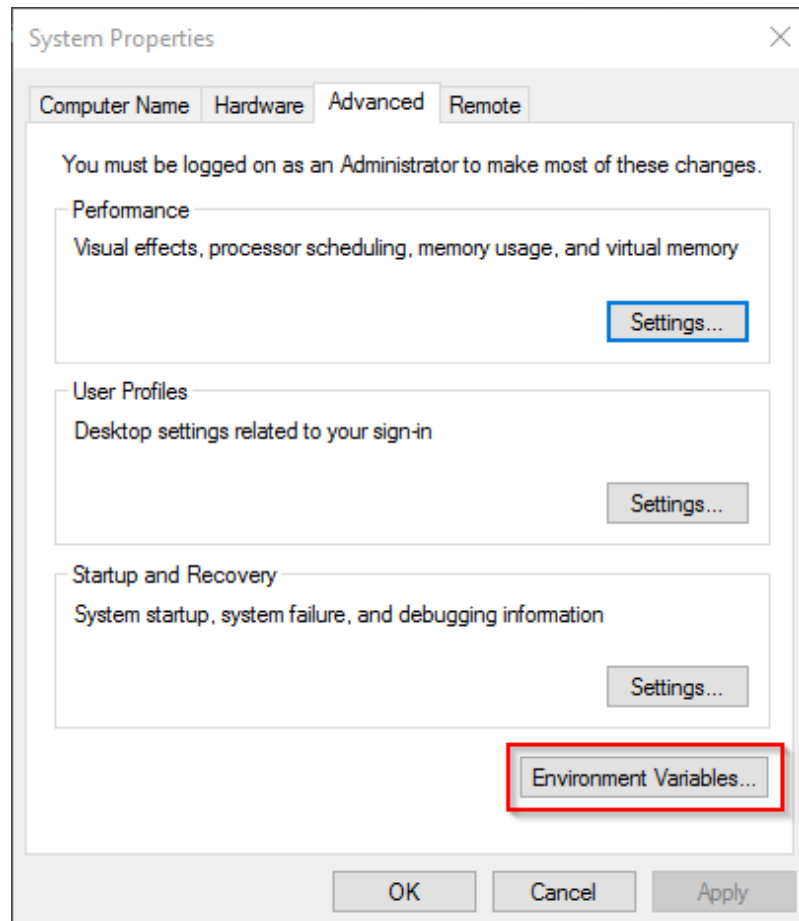

To use MariaDB easily on the command line of Windows, it is necessary to configure an environment variable in Windows accordingly. To do this, perform the following steps:

Enter the key combination Windows + R.

In the following dialog, enter "SystemPropertiesAdvanced.exe" (1) and confirm with OK (2):

Click "Environment Variables":

In the bottom pane of the now opened window double-click on the line "Path":

Add the path to your installation of MariaDB, which contains i.a. the file `mysql.exe` is located. By default, this is the path `C:\Program Files\MariaDB 10.3\bin`.

Close all previously opened windows one after the other by clicking "OK".

Next step

If you have completed all steps successfully, you can delete the previously downloaded "mariadb-10.3.13-winx64.msi" file from your hard disk and continue to the next step "[OpenJDK](#)".
