On the page *Special:Import*, follow these steps:

- 1. *Select file* and choose HW-mention.xml.
- 2. Enter an *interwiki prefix*. Since this field is required, simply add hw (for hallowelt).
- 3. **Keep** the selection *Import to default locations*.

The template is now available in your wiki.

Important! If, after importing the template to your wiki, the input field is not displayed when you first integrate the template into a wiki page, you need to open the template in the *Template* namespace, make a "null-edit" change (e.g., insert spaces) and save the template. The input field should now be displayed correctly when using the template.
