

Templates download/Banner

This template creates a page banner that you can include on portal pages, for example. You can see an example here in the Helpdesk on the topic pages, e.g, [quality assurance](#).

Download

**Vertically centered**
The box content is centered vertically and the title has no margin.

**Box with padding**
This box container has some padding around the content. Try out 2 or 3 lines as well.

**Box without padding**
This box container has no padding but there is padding around the text. Try out 2 or 3 lines as well.

Box without image
A banner can be text-based as well. Just don't add an image.

Importing the template

The import file is included in the archive file *HW-banner.zip*. Unpack the zip file first.

On the page *Special:Import* follow these steps:

1. **Select file** and choose *HW-banner.xml*.
2. **Enter** an Interwiki prefix. Since this field is required, simply add *hw* (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** *Sie Upload file...*

The form-based template is now available in your wiki.

Important! The input fields for the template parameters are usually not automatically available after importing the template to your wiki. You have to open the imported template file and make an edit (e.g., add a space and then save the page) to activate the template data functionality. The input fields should now be displayed correctly when you use the template on a page.

Pages included in the import

The xml import creates the following files in your wiki:

- Template:Banner
- Template:Banner/styles.css

Creating a banner

Now open your page u want to edit and click on Insert click Templates and search for the template Banner.

Now u see the Banner on your page click edit and u will see the option menu. Here u can change how your banner looks.
