

## Templates download/Banner

This template creates a page banner that you can include on portal pages, for example. You can see an example here in the Helpdesk on the topic pages, e.g, [quality assurance](#).

### Download

**Vertically centered**  
The box content is centered vertically and the title has no margin.

**Box with padding**  
This box container has some padding around the content. Try out 2 or 3 lines as well.

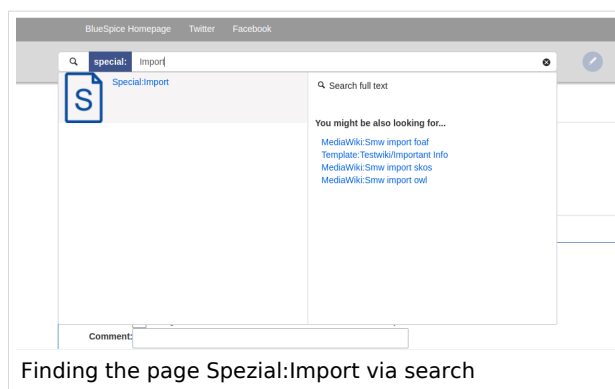

**Box without padding**  
This box container has no padding but there is padding around the text. Try out 2 or 3 lines as well.

**Box without image**  
A banner can be text-based as well. Just don't add an image.

## Importing the template

The import file is included in the archive file *HW-banner.zip*. Unpack the zip file first.

On the page *Special:Import* follow these steps:

Finding the page Spezial:Import via search

1. **Select file** and choose *HW-banner.xml*.
2. **Enter** an Interwiki prefix. Since this field is required, simply add *hw* (for hallowelt).
3. **Keep** the selection *Import to default locations*.
4. **Click** *Upload file...*

Import settings

The form-based template is now available in your wiki.

**Important!** The input fields for the template parameters are usually not automatically available after importing the template to your wiki . You have to open the imported template file and make an edit (e.g., add a space and then save the page) to activate the template data functionality. The input fields should now be displayed correctly when you use the template on a page.
