For more info, visit <a href="#">Mediawiki</a> .			

## Features

**CookieWarning** is a small extension that adds a small but well-visible information banner to the wiki.

It informs users that the wiki uses cookies. The default message also includes a sentence that the user agrees to the use of cookies.

## Übersicht der Cookie-Einstellungen

The following cookies are either necessary or comfort cookies. Necessary cookies cannot be deactivated by a user.

COOKIE NAME	DESCRIPTION	TYPE
<b>MediaWiki</b>		
\$wgCookiePrefixBlockID	This is usually the block ID concatenated with an HMAC in order to avoid spoofing (T152951), but if wgSecretKey is not set will just be the block ID.	necessary, if block exists
	A cookie to tell all CDN edge nodes to "stick" the user to the DC that handles this POST request (e.g. the	

COOKIE NAME	DESCRIPTION	TYPE
\$wgCookiePrefixUseDC	"master" data center).	necessary, if in use
\$wgCookiePrefixUseCDNCache	Have the user briefly bypass CDN so ChronologyProtector works for cacheable URLs.	comfort
\$wgCookiePrefixUserID	ID of the logged in user ( only for logged in users )	necessary
\$wgCookiePrefixUserName	Username of logged in user ( only for logged in users )	necessary
\$wgCookiePrefix_session	Session ID for the current session	necessary
\$wgCookiePrefixforceHTTPS	Force HTTPS for logins	necessary
\$wgCookiePrefixLoggedOut	Force HTTPS for logins	comfort
\$wgCookiePrefixnotificationFlag	Used for Echo notifications	comfort
<b>BlueSpice</b>		
\$wgCookiePrefix_MWCookieConsent	State of the user's cookie consent	necessary
\$wgCookiePrefixbs-visualdiff-tabs	Saves state of BlueSpiceVisualDiff tabs	comfort
\$wgCookiePrefixCalumma_state	State of calumma panels	comfort
\$wgCookiePrefixVEE	Visual editor - user preference - VisualMode or wikitext	comfort

**Note:** Any extension, or even code in Common.js may add cookies. A final and definitive list depends on the particular system in question.
