Features

Nuke is an extension for administrators to delete more than one page at once. This tool allows mass deletions of pages recently added by a given user or an IP address.

Where can I find the mass delete function?

Go to the special page `Special:Nuke`. If you are an administrator you can see the dialogue.

Functionality of Nuke

### Seek for pages you want to delete with parameters

Screenshot: Delete several pages with the MediaWiki Extension "Nuke"

- Input the username or IP address to get a list of pages to delete, or leave blank for all users.

- **Pattern for the page name**: Use a keyword to select all articles that contain this keyword in their title, e.g. `%Test%`
- **Namenspace**: Limit the deletion to a special namespace
- **Maximum number of pages**: Limit the number of pages

Delete several pages at once

Choose all articles you want to delete. Afterwards click at "delete".
