

## Archive:DataValues Validators

**DataValues Validators** is a small library that contains common ValueValidator implementations.

### Installation

---

The recommended way to use this library is via [Composer](#).

#### Composer

To add this package as a local, per-project dependency to your project, simply add a dependency on `data-values/validators` to your project's `composer.json` file. Here is a minimal example of a `composer.json` file that just defines a dependency on version 1.0 of this package:
