

Archive:DataValues Validators

DataValues Validators is a small library that contains common ValueValidator implementations.

Installation

The recommended way to use this library is via [Composer](#).

Composer

To add this package as a local, per-project dependency to your project, simply add a dependency on `data-values/validators` to your project's `composer.json` file. Here is a minimal example of a `composer.json` file that just defines a dependency on version 1.0 of this package:

```
{
    "require": {
        "data-values/validators": "1.0.*"
    }
}
```
