State:	stable	Dependency:	MediaWiki
Developer:	HalloWelt	License:	-
Type:		Category:	Rich Articles
Edition:	BlueSpice pro		
View help page			

Features

Allows you to quickly sign off a wiki article.

Functionality

- There is bs:signhere tag
- When this tag is added to a page, a field to add a signature appears
- When clicked, this field will generate a signature above itself

Visibility (eg views or namespaces)

Will be shown in view mode of an Article. Everyone with edit right will be able to sign.

Sorting

Signatures appear in the order they were added.

Scaling

All signatures will always be shown.

Restrictions

Question of forgery was discussed. Reason is that signatures will be added as text, and therefore could be edited by other users. This is not obvious at first glance (while reading). However, every change will be visible in the log. So it can be known for sure, if the signatures have been changed after the fact.
